NON-TOXIC
NOT SLICK

SoyFlex™

RELIABLE DUST CONTROL

SoyFlex is a revolutionary new dust suppressant that bonds with water after application rather than washing away, creating a seal that lasts far longer than tree sap or Calcium Brine, and at a lower cost.

Each pre-mixed pail covers a 500 sq. ft. area without harming any surrounding foliage, pets, or vehicles. SoyFlex is made from 100% bio-degradeable American grown Soy Products.

SoyFlex is easy to apply using any standard sprayer, then spraying water over the applied area.
